

PayUmoney Shopify Documentation

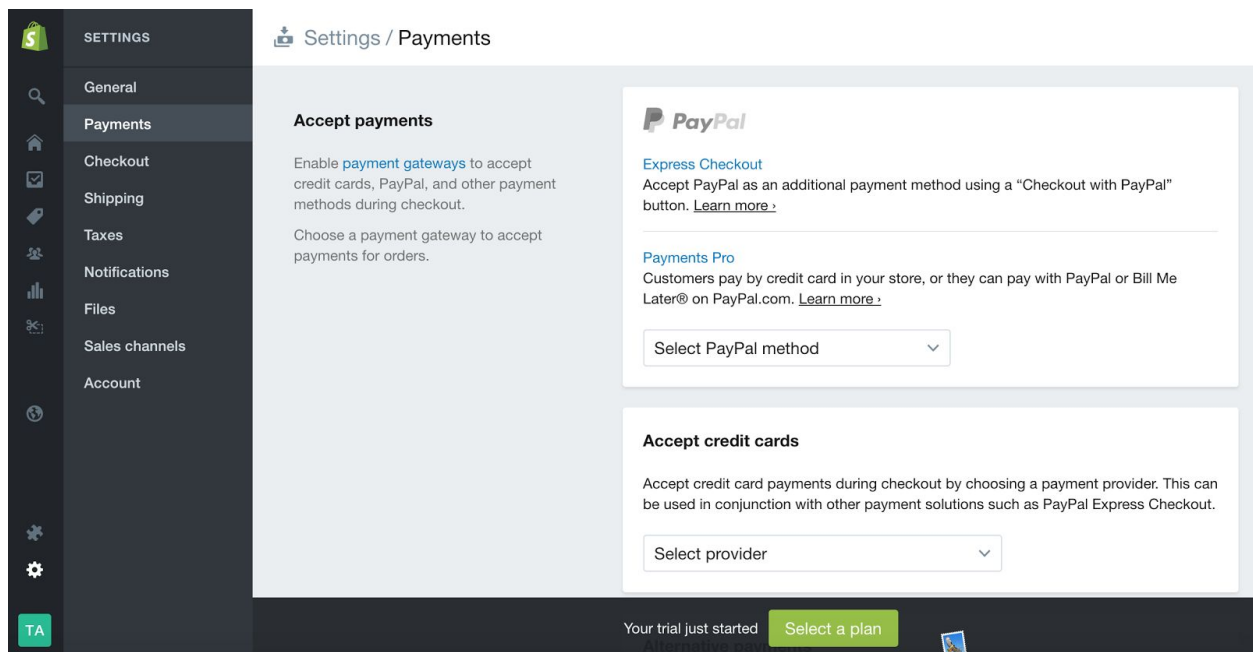

Prerequisites

To Integrate PayUmoney payment gateway, you must:

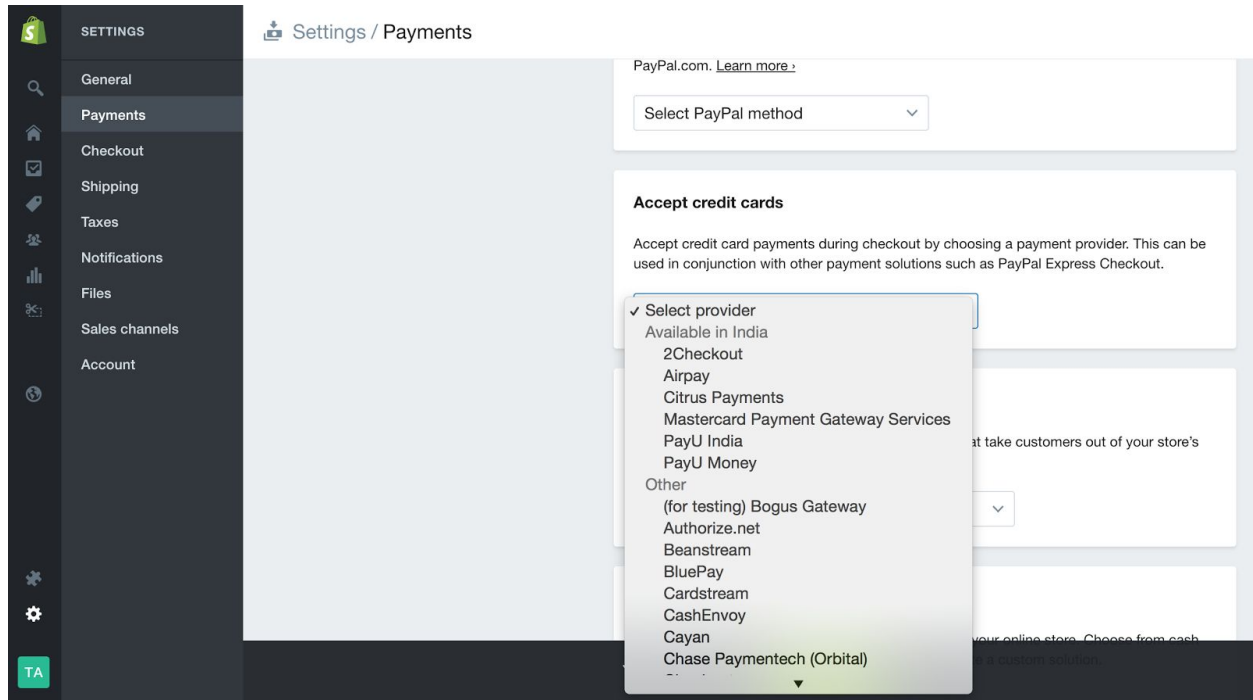

1. Have a merchant account with PayUmoney. If haven't already registered, please visit <https://www.payumoney.com/> and then register as a merchant.
2. Know your Salt & Key. These are available on the dashboard. If you already have a PayUmoney merchant account, please login at <https://www.payumoney.com/> and you will be able to retrieve your salt and key from the "Account details" tab.

Steps to Integrate

- 1) Login to your Shopify Admin account click on **'Settings'** and then choose **'Payments'**.

2) From the 'Accept credit cards' section, Click on 'Select Provider' and choose PayUmoney from the list.

Note: If your merchant account is with PayUmoney, please keep in mind that your account will work only with the option 'PayU Money' and not 'PayU India'. PayU India option is for those merchants who are on boarded with 'PayUBiz'.

3) The following screen shall be displayed to you. Enter the **Merchant Salt & Merchant Key** available from the PayUmoney Dashboard and click '**Activate**' to start collecting payments via PayUmoney.
